

## Safeguarding Apartment Dwellers

Summit Companies a premier Midwest region Fire and Life Safety (FLS) specialist company, with an expanding national presence, provides complete fire extinguisher, fire suppression, fire alarm & security and fire sprinkler systems and services designed to protect life and property.

Recently Summit Companies' La Crosse, WI office completed a fire life safety project involving a fire alarm system, door access controls, monitoring of the fire/security systems and portable fire extinguishers for Sawyer Apartments, a new eighteen-unit apartment building under construction in the City of La Crosse.

Sawyer Apartments – New Construction Multifamily Housing Complex

Fire Alarm Systems by FIRE-LITE

Notification Devices - Horn/Strobe, Smoke Detectors, e-Lights

The project involved the design and installation of a FIRE-LITE FL-9600UDLS fire alarm system utilizing SYSTEM SENSOR notification devices. The access control system for doors and building entrance was by Linear Pro. And ANSUL SENTRY dry chemical fire extinguishers were installed in recessed hallway cabinets per building code.

Summit Companies was hired directly by Brett Sawyer Properties to design and install both a fire alarm and access control system to provide life safety for the company's newest building which is focused on housing for university students. It's always a great experience to be part of a new project, seeing it go from plan concept, to finished building plan drawings, through construction and AHJ approval. Mr. Sawyer also requested a door access system, his first building to offer one which will provide added building security for tenants.
